
A
Height (n = 33)
1 component
2 components
Density
Offset from mirror line (SD)
B
BMI (n = 32)
Density
Offset from mirror line (SD)
C
Height p = 0.028
observed 13.2
Density
Likelihood ratio, 2 vs 1 component
D
BMI p = 0.451
observed 3.9
Density
Likelihood ratio, 2 vs 1 component
Classes differ by size and by DUP effect, not DEL
E
p = 0.006
Length (Mb)
mir
asy
p = 0.019
Genes
p = 0.651
DEL effect
p = 1e-06
DUP effect
Offset does not scale with CNV size, within either class
F
mirr ρ=+0.08
asym ρ=+0.02
Offset from mirror line (SD)
CNV length (Mb)
mirr ρ=+0.15
asym ρ=-0.33
Genes
Height: pooling the classes masks the gene-count dose response
G
Deletion effect (SD)
all ρ=-0.33 p=0.064
mirr ρ=-0.61 p=0.003
asym ρ=-0.12 p=0.713
Genes
H
Duplication effect (SD)
all ρ=+0.01 p=0.968
mirr ρ=+0.51 p=0.018
asym ρ=+0.01 p=0.966
Genes
BMI: no dose response, and no classes to pool
I
Deletion effect, BMI (SD)
all ρ=+0.05 p=0.772
no class label to stratify
Genes
J
Duplication effect, BMI (SD)
all ρ=+0.10 p=0.595
no class label to stratify
Genes
mirror (21)
asymmetric (12)
BMI loci (32)
all loci pooled
