Height and head circumference by age and BMI in 16p11.2 and 22q11.2 CNV carriers

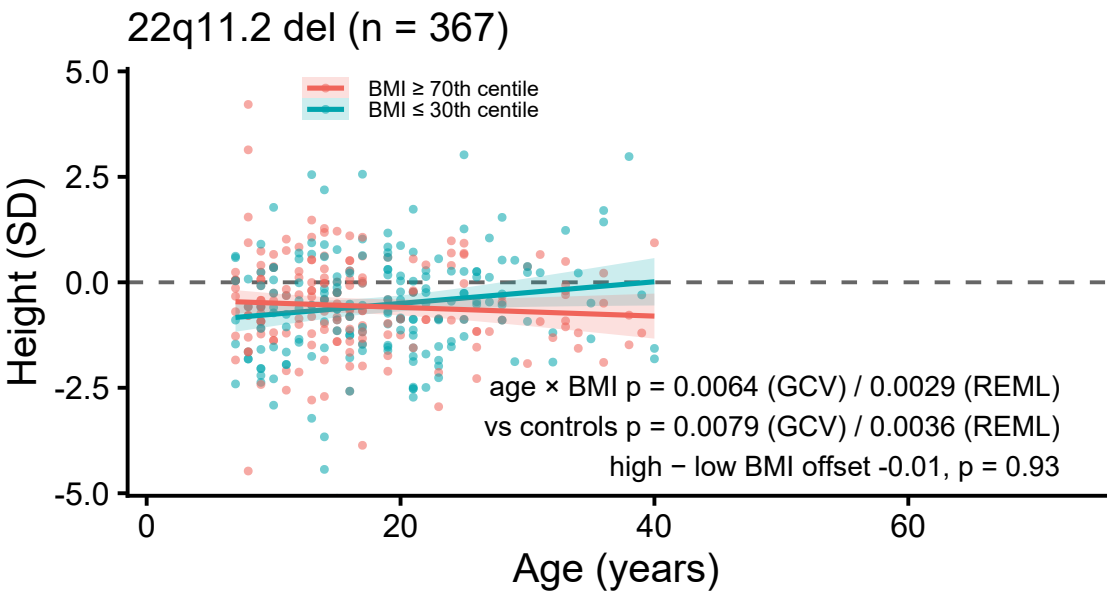

BMI ≥ 70th vs ≤ 30th centile (middle 40% dropped), all loci.
One record per person (latest visit), G2MH + Cardiff + SVIP + SSC + Searchlight (height only). Curves: GAM ± 95% CI.

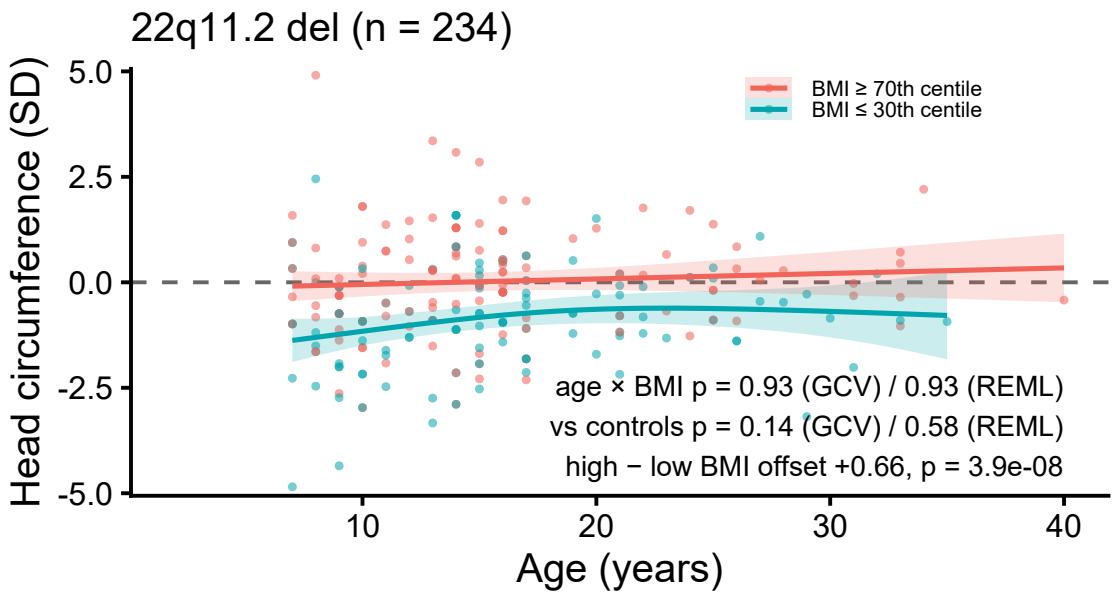

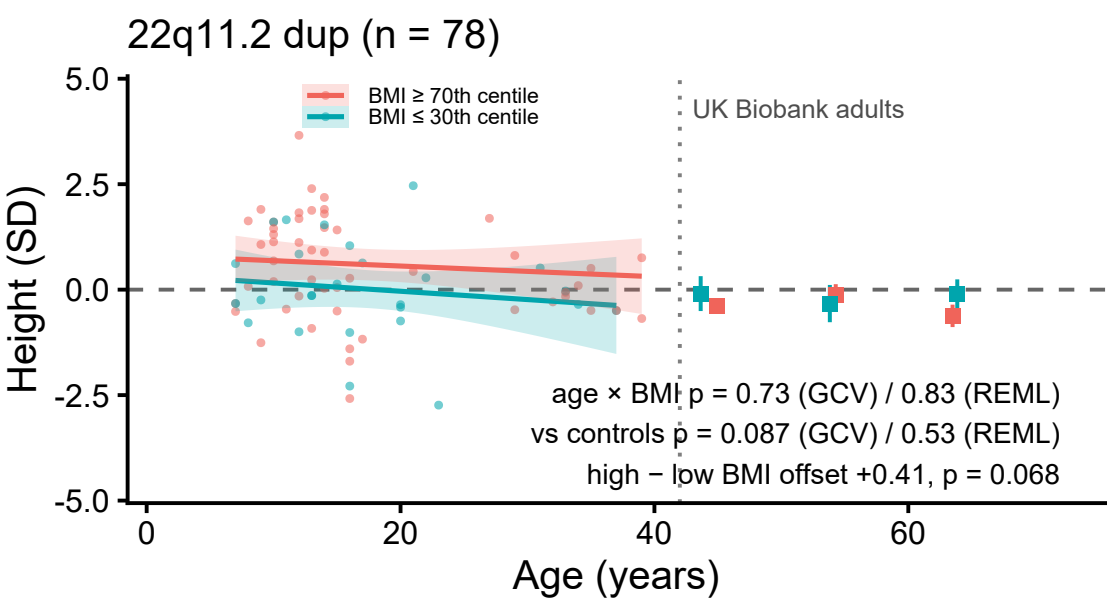

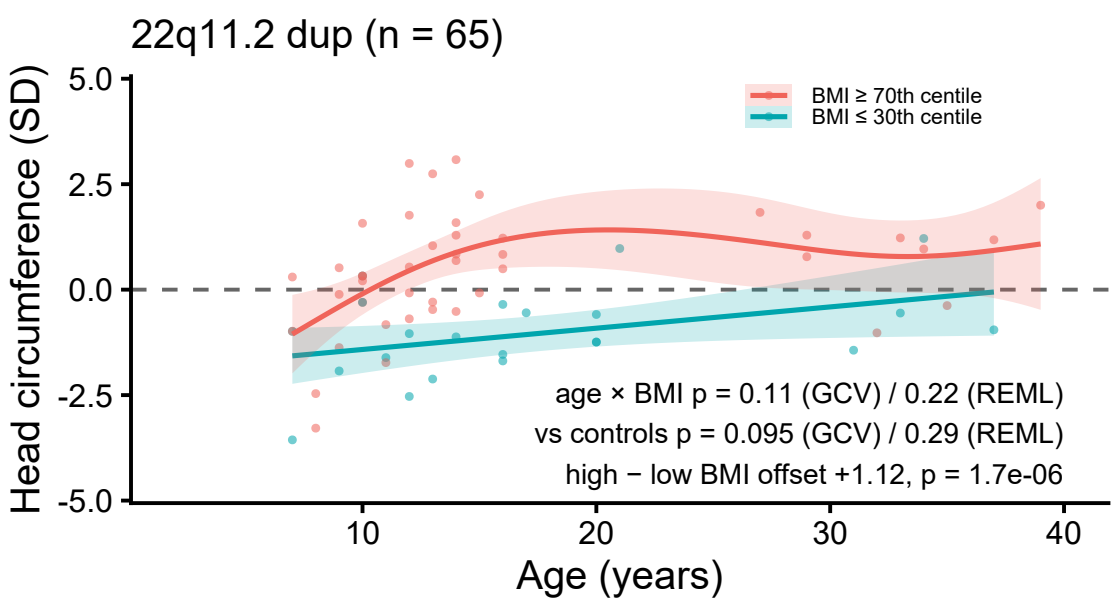

CNV × age × BMI: tensor-product GAM with continuous BMI vs SSC/SVIP/G2MH non-carrier controls (Anjali's test).
Offset: high- minus low-BMI shift of the carrier age curve. Z: < 18 y childsds WHO/UK90; ≥ 18 y within-sample Box-Cox.
