A
Height (n = 33)
1 component
2 components
mirror
asymmetric
Density
Offset from mirror line (SD)
B
BMI (n = 32)
Density
Offset from mirror line (SD)
C
Height p = 0.028
observed 13.2
Density
Likelihood ratio, 2 vs 1 component
D
BMI p = 0.451
observed 3.9
Density
Likelihood ratio, 2 vs 1 component
Asymmetric CNVs are larger
Offset does not scale with size
E
p = 0.006
CNV length (Mb)
mirror
asym.
p = 0.019
Genes
mirror
asym.
F
mir ρ=+0.08
asym ρ=+0.02
Offset from mirror line (SD)
CNV length (Mb)
mir ρ=+0.15
asym ρ=-0.33
Genes
